

The Department of **Biology**, Institute of Zoology, Applied Zoology lab invites applications for a

Postdoctoral Research Assistant (salary level E 13 TV-L).

The position is fixed-term from 1 October 2015 to 31 October 2017 (fixed term according to the federal law WissZeitVG).

Duties: Sequencing, comparative analysis of the genome and epigenome *Drosophila* lines. Metagenomic analysis of insect microbiomes. Supervision of technical staff to support computer networks. The development, or continuation, of an own, independent research field (such as image analysis, phylogenetics, or others) is possible and desired.

Required Qualifications and Skills: PhD in biology, bioinformatics, computer science or related area. Research experience in evolutionary genetics, population genetics and bioinformatics.

The TU Dresden aims to promote people with disabilities and particularly encourages their applications, with respective reference. In case of equal suitability of candidates, people with disabilities classified as in SGB IX will be given priority.

Please send your application (without photograph and date of birth) and your cv, as well as a max. one-page long statement of your research interests by 31.8.2015 using reference **AngZoo/MA3** to: **TU Dresden, Faculty of Science, Applied Zoology, Prof. Klaus Reinhardt, 01062 Dresden, Germany** or as a single PDF file to <anja.jahn@tu-dresden.de>. Please only submit copies as originals will not be sent back. We are unable to reimburse interview costs, but telephone or other interviews will be possible. Please contact <Klaus.Reinhardt@tu-dresden.de> for further details on the position, or <<http://tinyurl.com/mvyropk>> für further information on the Applied Zoology lab.
